Ongoing Maintenance

We recommend saving the tools that are provided with your KneeRover® product, as you may need them to provide ongoing maintenance. With routine use, nuts and bolts on the KneeRover® knee walker can become loose. To ensure safe operation of your KneeRover® scooter, it is important to periodically inspect for loose nuts and bolts and re-tighten as appropriate.

Please visit kneerover.com/pages/kneerover-maintenance-videos for additional support in maintaining your KneeRover® product.
